

Значительно расширены библиотеки экранных элементов в DOPSoft

В программном обеспечении DOPSoft, начиная с версии 4.00.04.32, Delta Electronics значительно расширила и улучшила библиотеки экранных элементов. DOPSoft предназначается для программирования панелей оператора Delta Electronics серии DOP-100. Элементы в новых библиотеках имеют красивый и современный дизайн, добавлены сложные элементы типа двигателей, ёмкостей, контроллеров, панелей, задвижек, труб и т.п.

Ниже приведены примеры экранных элементов новых библиотек.

<p>Контроллеры и измерительные приборы</p>
